

The Core team met and reviewed the improvement strategies and came up with four broad strategies for the SSIP.

Broad strategies include:

- Promote use of evidence based practices
- Provide professional development including training and coaching
- Improve data collection, reporting, and effective use of data
- Implement messaging about social and emotional development

Stages: For each of the broad strategies, we will engage in each of the following four stages.

1. Implementation Plan Development
2. Training and preparation for implementation
3. Implementing strategies
4. Ongoing reflection and continuous feedback loop, including data reviews on a regular basis

Brainstormed ideas from November SSIP Committee:

- 1. Training for providers in social/emotional development- 13 votes**
2. Providing a coach for each area- 7 votes
- 3. Using a standardized social/emotional tool for all children- 18 votes**
4. Equal access for Part C services across the state- 2 votes
5. Professional development on coaching strategies for practitioners (Sheldon and Rush)- 8 votes
6. State adopts uniform practice for identification of social/emotional delays- 5 votes
7. Criteria around integration of services- 1 vote
- 8. Statewide messaging around social/emotional development and provide information about social/emotional health at each developmental stage- 15 votes**
- 9. Training, coaching and support for front line providers- 14 votes**
10. Looking at the quality of parent/child interaction and parenting factors- 3 votes
11. Increase training and technical assistance around COSF- 6 votes
12. Each intermediate school district identify and track their highest need population- 6 votes
13. Training *Early On* personnel on the standardized tool- 4 votes
- 14. Pre-service and service providers having adult learning strategies- 10 votes**
15. Coordinate with additional organizations to support the families and to increase awareness and a warm hand-off- 5 votes

**16. Use evidence-based strategies- 11 votes**

17. Embed cultural competencies in all strategies- 8 votes

18. Increase funding and resources- 8 votes

**19. Improve data collection systems- 12 votes**

20. Use data to improve practices- 9 votes

21. Crosswalks for standardized tools to aid in COSF ratings- 1 vote

22. Disseminate SSIP work- 1 vote

23. Collect COSF on each child and send to Wayne State- 1 vote

24. Collect COSF on an annual basis for each child- 1 vote

The improvement strategies with the highest number of votes were:

- Using a standardized social/emotional tool for all children- 18 votes
- Statewide messaging around social/emotional development and provide information about social/emotional health at each developmental stage- 15 votes
- Training, coaching, and support for front line providers- 14 votes
- Training for providers in social/emotional development- 13 votes
- Improve data collection systems- 12 votes
- Use evidence-based strategies- 11 votes
- Pre-service and service providers having adult learning strategies- 10 votes
